SUMMARY – Software Engineer Graduating BS May, 2026 & MS May, 2027

Motivated and detail-oriented Backend Software Engineer with strong foundations in Software Design, Machine Learning, and Data Systems. Experienced in building scalable backend architectures using Python, C, and SQL, integrating cloud services through AWS, and building Front End systems with React and Typescript. Looking for internships focused on Data Driven Software Engineering and/or Machine Learning.

PROJECTS & EXPERIENCE

HaystackID MQP

Student Researcher

Worcester, MA

Present

- Worked with HaystackID to research, implement, and benchmark strategies for using Machine Learning and AI Models to perform Entity Extraction on large datasets of Natural Language
- Trained AI Models capable of performing Entity Extraction at up to 87% of human ability
- Parsed and analyzed multiple 100 GB datasets using modern tools i.e. Pandas and HuggingFace
- Wrote research quality code and documentation, and 25 page research paper

Software Engineering

Student

WPI

Fall 2025

- Deployed a 25,000 line Full-Stack Application using React, Typescript, and the AWS CDK in 8 weeks
- Gained proficiency in using 5+ AWS services (Lambda, RDS, API Gateway, S3, and IAM)
- Gained proficiency in managing real user data in a MySQL database with 10 tables and 1000+ records
- Successfully assumed a leadership role in a 4 person team by coordinating tasks and explaining ideas

DI, DIII Baseball

Student Athlete

Sacred Heart University, Fairfield CT & WPI

2022 - Present

- Compted in 30+ games per season, consistently performig in high-pressure environments requiring rapid decision making and precise execution
- Balanced a 30+ hour Division I/III athletics schedule with an 18+ credit academic course load
- Contributed to team leadership through preperation, accountability, and communication

SKILLS

Language Abilities: Python, C, Typescript, React, SQL, Git

Skills: Back-End Development, OOP, Machine Learning, Deep Learning, PyTorch, RAG, Kubernetes, Algorithms, CI/CD, AWS, REST APIs, AI tools, Big Data, Hugging Face, Databases, Curiosity, Collaboration

EDUCATION

Worcester Polytechnic Institute

Bachelor of Science in Computer Science (4.0)

Worcester, MA

Graduating May 2026

- Software Engineering
- Machine Learning
- Deep Learning
- Knowledge Discovery and Data Mining
- Operating Systems
- Artificial Intelligence
- Linear Algebra
- Probability and Statistics
